

“NO Child

Legacy Land Trust’s new “No Child Left Inside” Environmental Education Program is designed to put the “field” back into field trips! With outdoor activities and learning experiences that stimulate young minds to appreciate nature, the program is helping tomorrow’s conservation leaders connect with nature today:

- ❖ *Water studies* ❖ *Forest studies* ❖ *Insect studies* ❖
- ❖ *Birding* ❖ *Learning about Invasives* ❖ *Orienteering and GPS units*
- plus, opportunities for volunteer work on conservation projects*

Funding is still needed for support of the program!

- ❖ *Cost of bus trips for schools without the ability to send students on field trips*
- ❖ *Microscopes and magnifiers*
- ❖ *Collecting nets and seines*
- ❖ *Measuring equipment and binoculars*
- ❖ *Field Guide books and nature journals*
- ❖ *Back packs and collecting bags*
- ❖ *GPS units and computer software*
